## Technical Skills:

Javascript | ES6 | React | HTML5 | Node.js | CSS3 | Webpack | jQuery | Git | Github | Sass | MongoDB |  
Mongoose | Pug

## Projects:

**Watchy** | See what TV shows your friends are currently watching. | [Live](#) | [Github](#)

- Implemented a friends system allowing users to share their favorite shows seamlessly.
- Applied Functional Composition to simplify code.
- Employed NoSQL database to store user information and passwords.
- Created a password reset flow incorporating the SendGrid mail API.

**Movie Release Calendar** | Movie release information at a glance. | [Live](#) | [Github](#)

- Utilizes AJAX to asynchronously retrieve JSON data via theMovieDB.com API.
- Built from the ground up using modular components.

**Lord of the Rings Memory Match** | Lord of The Rings themed concentration game. | [Live](#) | [Github](#)

- Built using object oriented programming.
- Features animations, dynamic DOM creation, and interactivity.
- Incorporated Sass preprocessing for superior CSS organization.

**Calculator** | Fully functional basic calculator. | [Live](#) | [Github](#)

- Integrated basic unit-testing through the behavior-driven development framework Jasmine.

**City Information and News** | News and information site. | [Live](#) | [Github](#)

- Incorporates the New York Times, Wikipedia, and Google Maps Geolocation API to find and display relevant locations, and articles asynchronously.

## Past Experience:
